DETAILED ACTION

1. The response received 8/21/09 has been placed in the file and was considered by the examiner. This application currently contains claims 1-2, 4, 6, 8, 10-11, 13, 15 and 17-24 which are pending in this application.
2. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 8/21/09 has been entered.
3. Claims 1, 6, 8, 10, 11, 15 and 18-19 are allowed with the following Examiner's amendment:

EXAMINER'S AMENDMENT

4. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Attorney Scott P. Zimmerman on November 4, 2009.

The application has been amended as follows:

Rewrite claims 1 and 19 and cancel claims 2, 4, 13, 17 and 20 through 24 as follows:

Claim 1 (Currently amended) A cable drop support system comprising:

a base configured for attachment to an attachment surface, the base including at least one attachment device, wherein the attachment device is an adhesive ~~that adheres~~ for adhering the base to the attachment surface;

one or more telescopic segments connected to the base that extend and retract in length in a telescoping configuration;

a cable receptacle attached to an end portion of a final segment of the telescopic segments, the cable receptacle having a generally U-shaped cross-section for receiving therein at least an intermediate portion of a cable;

a control system installed in the base and operatively associated with the cable drop support system, the control system ~~configured for~~ receiving instructions communicated through at least one wireless communication media;

a portable communication device ~~configured to provide~~ providing instructions to the control system through the at least one wireless communication media, the portable communication device is selected from the group consisting of a laptop, a personal digital assistant, and a telephone;

at least one mechanical drive mechanism connected to the final segment of the telescopic segments and operatively coupled to respond to the control system, the at least one mechanical drive mechanism extending and retracting at least ~~configured to at least one of extend and retract~~ the final segment; and

an electric generator power source providing electric power to the cable drop support system to cause extension and retraction of the telescopic segments from the instructions received from the control system.

Claim 19 (Currently Amended) A cable drop support system comprising:

a base ~~configured for attachment to an attachment surface, the base~~ including at least one attachment device and having an elliptically shaped cross section with a major diameter that forms opposite pointed ends of an ellipse, wherein the attachment device is an adhesive that adheres the base to ~~the~~ an attachment surface, and wherein the attachment surface includes a surface portion area of a service vehicle;

a first segment connected to the base;

at least a second segment attached to the first segment, the first and second segments being structured in a telescoping configuration;

a cable receptacle attached to an end portion of one of the segments, the cable receptacle having a generally upwardly open U-shaped cross-section for receiving therein an intermediate portion of a cable and for supporting the intermediate portion of the cable;

a control system operatively associated with the cable drop support system, the control system comprising a telephone sending instructions over a wireless communications media to cause extension and retraction of the first and second segments;

at least one mechanical drive mechanism connected to the second segment and operatively coupled to respond to the control system, the at least one mechanical drive mechanism extending and retracting ~~configured to at least one of extend and retract~~ the second segment; and

an electric generator power source providing electric power to the cable drop support system to cause extension and retraction of the second segment from the instructions received from the control system.

REASONS FOR ALLOWANCE:

The following is an examiner's statement of reasons for allowance: Claims 1, 6, 8, 10, 11, 15, 18 and 19 are allowable over the prior art references of record due to the combination of elements as specifically set forth in independent claims 1 and 19. Specifically, the prior art of record neither teaches nor suggests the at least one mechanical drive mechanism connected to the final segment of the telescopic segments for extending and retracting the final segment and operatively coupled to respond to the control system and a portable communication device providing instructions to the control system through the at least one wireless communication media; and an U-

shaped cable receptacle attached to an end portion of the final segment of the telescopic segment for receiving therein at least an intermediate portion of a cable.

The closest prior art of record, Nagle (AU. 200223231) or Shepherd et al. (US 6,042,080) or Hulse (US.6,290,377). Nagle discloses a telescopic cable support; Shepherd discloses a telescopic post having a magnetic base; Hulse discloses pneumatics to raise and lower a telescopic mast and a mechanical rack and pinion system to change the angle of the mast not to extend and retract thus the proposed combination would have not obvious to meet the above limitations as specified in independent claims 1 and 19.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
